30 years of excellence —

EXPERTISE

With over 30 years at the forefront of flight training in Europe, and more than 2,000 graduated pilots who now fly for the world's leading airlines, FTEJerez has established itself as one of the leading and most exclusive flight training organisations, specialising in ab initio ATPL training programmes for aspiring pilots and airline cadets alike.

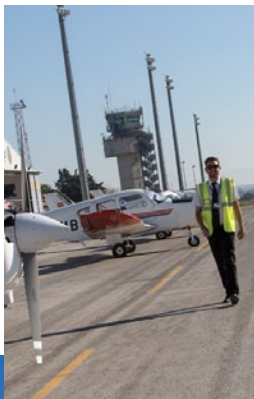

At FTEJerez we believe that we have what discerning clients would want to see in a top quality pilot training institution: The right **Environment**, **Experience**, **Equipment** and **Expertise**.

— Skills and expertise
OUR TEAM

At FTEJerez we believe that only by investing in people, can the quality training the industry demands be delivered. Our team of dedicated fulltime ground, flying and multi-crew instructors are passionate about what they do and are committed to help our cadets realise their potential to become exceptional pilots thanks to their experience, skills, dedication and FTE's proven course methodology.

Our training managers have extensive experience as Airline Captains, with thousands of hours flying commercially and managing teams for some of the leading European and UK airlines.

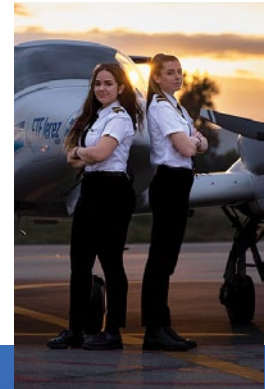

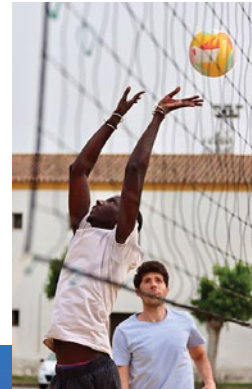

Aviation Campus like no other —

ENVIRONMENT

FTE's purpose-built, 70,000 sqm Aviation Campus in Jerez, Southern Spain, offers a unique setting with ideal flying weather year round. Combined with the experience of our instructors, state-of-the-art equipment and standardised course methodology, this environment guarantees a training experience which is second to none.

The Campus is not just about accommodation. At FTEJerez we believe that in order to optimise academic performance, a cadet must be able to concentrate on the training programme in an ideal environment, whilst enjoying sports, local culture and socialising during the free time available. Located in the grounds of an international airport, the FTECampus extends aviation training into the residential environment, fostering a greater sense of community amongst providing cadets, staff and visiting airline representatives.

- Fully equipped en-suite single rooms.
- Student Welfare & personalised customer service.
- Located in one of the most privileged locations in Europe: Andalusia.
- Full board accommodation.
- Sport & Leisure facilities.
- Student Committee.
- International & Multi-cultural environment.

Fleet & Simulators

EQUIPMENT

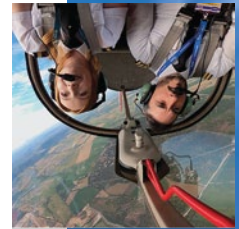

The aircraft fleet and simulators at FTEJerez have been carefully selected to ensure optimum training value is achieved on each training exercise.

Our fleet of 20 Piper Warriors have the classic analogue instrument panel design to ensure solid instrument flying skills. They are also fitted with a flight instrument glass upgrade, the Garmin G5, and the entire fleet features an aircraft tracking system to monitor the student's flying progress. Our single-engine fleet is enhanced with 10 brand new Piper PA28 Archer DTX aircraft. These aircraft are equipped with the advanced Garmin G1000 NXi avionics suite, featuring a full glass cockpit, which will significantly enhance our training capabilities and flight experience.

FTEJerez is also Europe's largest operator of Diamond DA 42NG aircraft. All 9 are equipped with the Garmin G1000 to ensure a smooth transition to flying a modern jet airliner. FTEJerez also features a Robin R2160 and a Citabria High Country Explorer, used for Advanced Upset Recovery Training (A-UPRT). The safety and quality of our fleet's maintenance is taken care by our Aircraft Maintenance Centre, which is exclusively focused on FTE's aircraft.

FTE's simulators are also located on campus, featuring an Alsim AL250-63 FNPT II, 3 Diamond DA-42 FNPT II Simulators, a B737-8000 NG FTD2 with Boeing data package, 200° collimated visual and 3 axis seat-motion cueing, and an Airbus A320 flight training device.

The most exclusive ATPL Programme in Europe

AFOP AIRLINE FIRST OFFICER PROGRAMME

The Airline First Officer Programme (AFOP) is an integrated ATPL course that is designed to take a cadet with little or no flight experience to obtain an ATPL licence under EASA and the UK CAA. This is the highest certification for a commercial pilot and allows direct access to pilot positions in Europe and the UK. To this end, FTEJerez maintains exclusive agreements with leading airlines, such as Aer Lingus, British Airways, easyJet, and many more.

Our career development team works closely with our cadets to identify suitable job opportunities and to prepare them for airline assessments, offering interview preparation, airline-specific assessment preparation and free sim refreshers prior to a sim check with an airline.

Our courses start practically every month, with small groups to guarantee the best quality of instruction. To join the AFOP, candidates must have completed A-Levels, Baccalaureate or equivalent secondary education, and must pass FTE's assessment tests, which are free and conducted online.

- Learn more at www.ftejerez.com/afop.
- You can submit your application at www.ftejerez.com/apply.
- Prepare your assessments with our preparation material: www.ftejerez.com/pretest.

Aviation training

AND MUCH MORE

UNIVERSITY STUDIES

Together with SETU Ireland (South East Technological University, FTEJerez has developed a programme that allows cadets the opportunity to graduate with both an ATPL licence and an official Bachelor's degree. This option is an excellent starting point for students who have just completed high school. Cadets who choose this plan complete a first academic year at SETU in Carlow, Ireland (from September to May) and join our AFOP in September of the following year.

MODULAR TRAINING

The Flight Deck Plus+ (FD+) is aimed at experienced PPL pilots who want to opt for the modular route. It includes an Advanced Flight Training phase (CPL/IR) followed by the APS MCC. Candidates who complete the full modular programme also benefit from our career development service. Highlights include:

- Same standards and instructors that train our airline cadets.
- Full board accommodation option.
- Fantastic instructor to student ratio.
- Use of recreational facilities included.

AIR TRAFFIC CONTROL TRAINING

FTEJerez has established itself as a prominent partner for leading air navigation service providers, with nearly 500 controllers graduated to date. We provide our cadets with the best job opportunities in the sector, with graduates working in major towers and control centers in Spain and various parts of Europe.
